

Hi, I'm Yugesh Marahatta.

Full Stack Developer specializing in mobile apps, web applications, and scalable systems.

Software Engineer at Wolfmatrix crafting elegant solutions with PHP, JavaScript, Swift, and modern AI pipelines.

About Me

I am a software engineer dedicated to building scalable, high-performance applications across web and mobile ecosystems. Emphasizing clean, structured design systems and reliable code bases, I enjoy collaborating in agile settings to solve complex development problems.

With expertise spanning frontend interfaces, scalable API integrations, and robust database layers, I bridge the gap between design and functionality. Currently focusing on modern software engineering paradigms and performance optimization structures.

Skills & Tech Stack

FRONTEND

React
JavaScript
HTML5 / CSS3
Responsive Web Design

AI & DATA

YOLOv5 Model Training
Computer Vision
Data Normalization

BACKEND

PHP
JavaScript (Node.js)
Python
REST API Engineering

CLOUD & DATABASES

MySQL
PostgreSQL
AWS Services

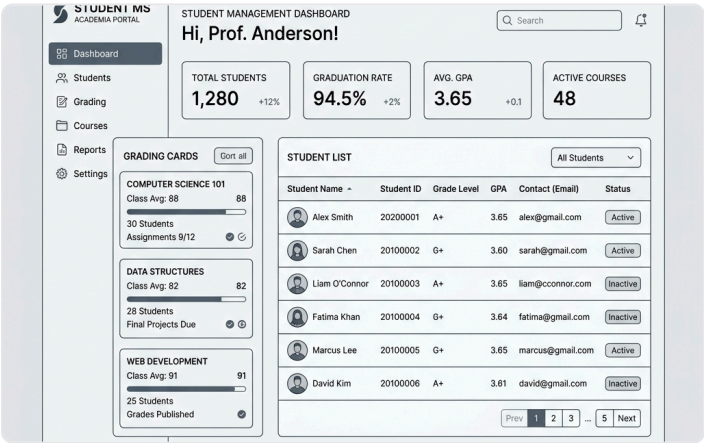

MOBILE

React Native
iOS (Swift)
Mobile UI Architectures

DEVOPS & TOOLS

Git / Version Control
Agile / Scrum Processes
Docker / Containerization

Featured Projects

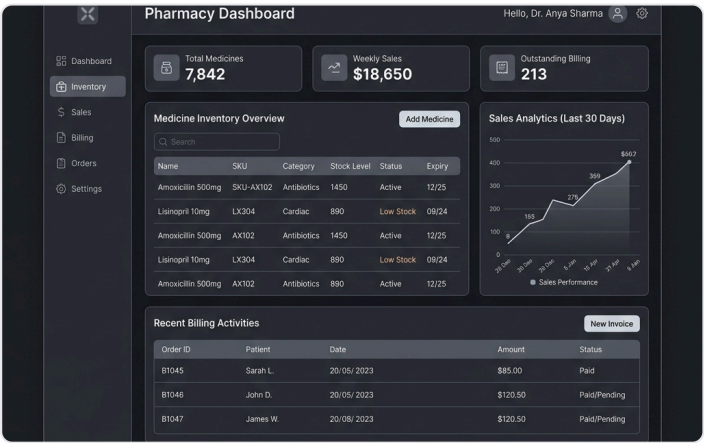

Lead Developer

Student Management System

A complete student management solution featuring student enrollment workflows, grades distribution boards, and interactive attendance trackers.

PHP · MySQL · Vanilla CSS

Repository

Developer

Pharmacy Management System

A secure desktop application designed for medical pharmacies to manage real-time drug inventories, sales logs, and customized invoicing.

Java · Swing · MySQL Database

Repository

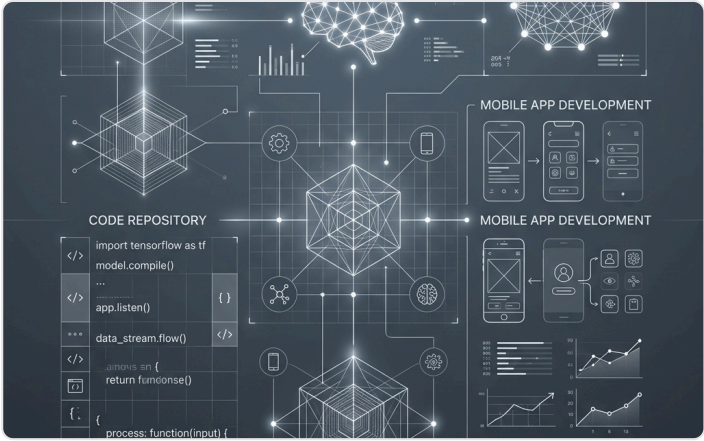

AI Engineer

Vegetable Detection YOLOv5

A computer vision pipeline utilizing YOLOv5 algorithms to identify, draw bounding regions, and categorize agricultural produce in food sorting lines.

Python · YOLOv5 · OpenCV · PyTorch

 Repository

Full Stack Engineer

Other Technical Projects

A compilation of proof-of-concepts exploring REST microservices, native mobile architectures, and automated testing integrations.

AI API · React Native · WebSockets

 All Repositories

Work Experience

Software Engineer

Nov 2024 – Present

Wolfmatrix

Engineering robust full-stack web and mobile applications. Optimizing system performance across database schemas, API controllers, and frontend workflows. Collaborating directly with development squads to design secure client-facing features.

Associate Software Engineer

Oct 2023 – Oct 2024

Wolfmatrix

Promoted for driving core database migrations, standardizing API designs, and building modular interfaces. Supported agile teams during release cycles and bug diagnostic pipelines.

Education
